

Editorial

<i>Leistriz AG</i> The Counter-rotating Pioneers	286
---	-----

Internal Mixers

P. J. Gramann, L. Stradins, T. A. Osswald Flow and Heat Transfer Simulation of the Mixing of Polymer Blends Using the Boundary Element Method	287
---	-----

Twin Screw Extrusion, Reactive Processing

<i>T. Domschke, C. Justus</i> Heat Transfer in Single and Twin Screw Extruders	294
<i>W. Michaeli, W. Frings, H. Höcker, U. Berghaus</i> Reactive Extrusion of Styrene Polymers	308
<i>H. Ishida, D. A. Zimmerman</i> RIM-pultruded Prepreg for the Injection Molding of Long-fiber Epoxy Composites.....	319

Die Extrusion

<i>T. Kegasawa, J. L. White</i> Flow Simulation of a Polymer Melt in a Roller Die	328
<i>H. Potente, W. Hanhart, V. Schöppner</i> Potential Applications for Computer-aided Extruder Design	335

Molding

<i>H. Potente, M. Hansen</i> The Gas-assisted Injection Molding Process- Comparison between Experiment and Simulation	345
<i>P. Ralston, A. Wright, K. Stoll, D. Harper</i> Control Strategies for Cyclic Polymer Processes.....	352
<i>M. M. Weissenberger, A. J. Giacomini, J. A. Reuscher, C. M. Russell</i> Real-time Neutron Radiography of Injection Mold Filling	360
<i>H. G. deLorenzi, C. A. Taylor</i> The Role of Process Parameters in Blow Molding and Correlation of 3-D Finite Element Analysis with Experiment	365

PPS-News

Calendar of Future PPS Meetings	375
Calendar of Events	375

Professional News

Internal Developments in Polyolefins	376
International Acquisitions and Joint Ventures.....	377
